

# Salesforce Testing and QA Services

ATTAIN SALESFORCE EFFECTIVENESS WITH A BUG-FREE INSTANCE

Trusted by more than 150,000 companies, Salesforce is the most preferred multi-industry CRM in the world. Organizations rely on this dynamic horizontal platform to write new customer success stories every day. However, the sheer size of Salesforce presents challenges of its own: Companies find it hard to leverage updates without running into bugs.

Bugs can ruin end-user experience which shows on various customer engagement metrics. You need top-notch engineers to handle updates if your goal is to ensure smoother workflows, an error-free instance, and the maximum return on your investment.

That's where Grazitti comes into the picture. Our Salesforce Quality Engineers understand Salesforce from soup to nuts. You can go ahead and partner with us without a shred of doubt.

## We Cover The Whole Nine Yards Of Salesforce Testing

### Our Forte Is In

- Functional Testing
- Security Testing

- Unit Testing (by Developers)
- Customization Testing
- Sandbox Testing
- Automation Testing

## Our quality engineers ensure the top-notch testing and QA services for:

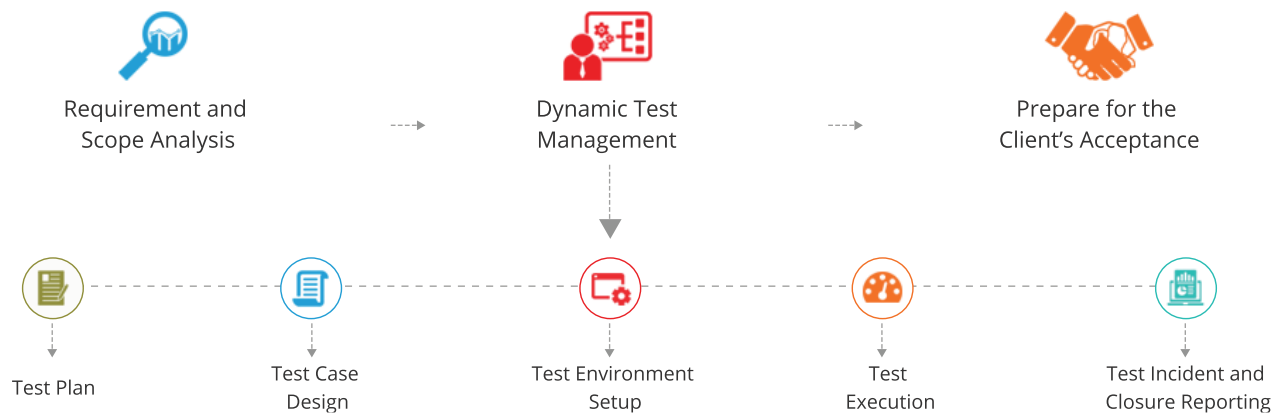

### Apps and Products Built on Top of Salesforce

Investing in a half-baked app or technology can be detrimental to your business. Bugs and software failure can cause friction in customer engagement and hinder progress. You have the power to prevent it. Allow us to remove the quirks and mitigate risk. Our highly-qualified Salesforce platform testing team will ensure that your apps are AppExchange-ready and your products deliver the right value to your user.

### Companies Wanting a Bug-Free Salesforce Instance

Coping with frequent changes in how your instance is administered, workflows are managed, and new technologies are integrated can be taxing. Our Salesforce Service Cloud, Sales Cloud, and eCommerce Cloud testing teams validate the changes in all your Salesforce instances and integrations to eliminate risk and guarantee security. Our expertise lies in efficiently carrying out for end-to-end testing for Classic and Lightning that ensure lasting success of your business.

### The Agile Salesforce Testing Process

### Case Studies

- Ensuring that products are ready for every release with minimum errors
- Ensuring an immaculate and bug-free CPQ system
- Making sure if an integrated tool works well with Sales Cloud
