

Magento Marketo Integration Connector

LEVERAGE MARKETO CAPABILITIES IN YOUR MAGENTO STORE

Grazitti's Maginate is a flexible, powerful, and an affordable solution for all your integration needs between the two platforms.

Our connector lets you bring important information into/from Marketo for better personalization, share lead data across Magento and Marketo, and get a better ROI from marketing campaigns.

Key Features of Maginate:

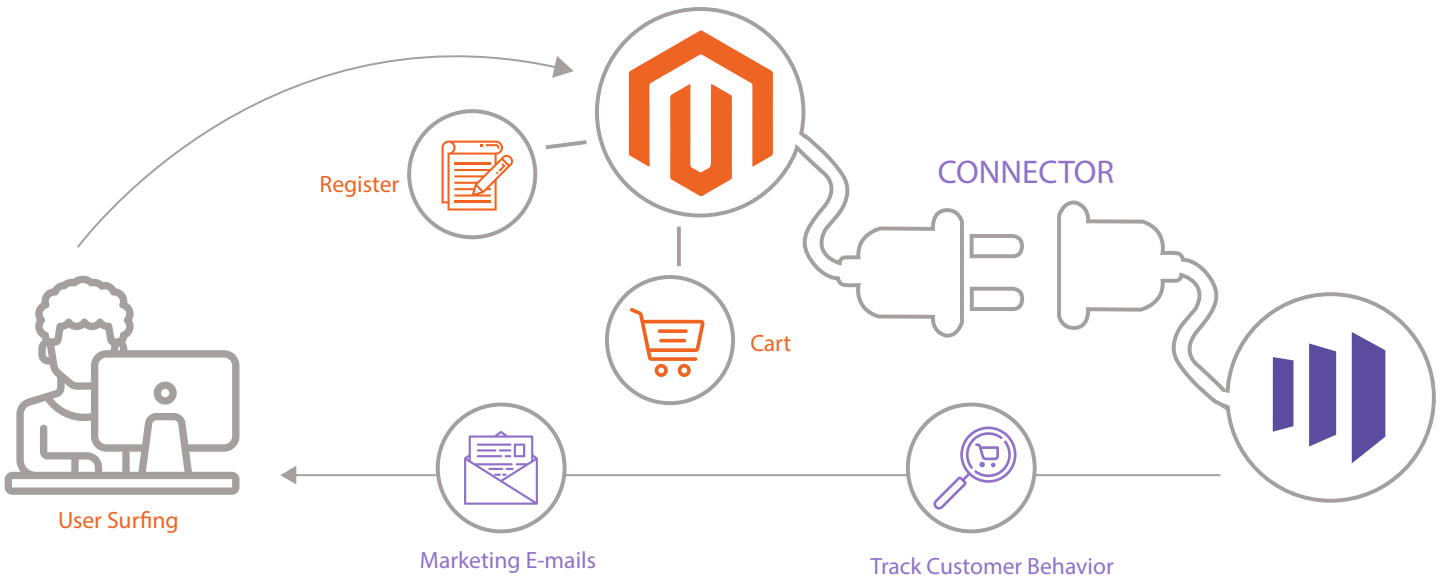

- **Customer Data Sync:** The connector syncs your Magento store's customer data seamlessly in Marketo by creating a new lead or associating it with an existing lead in real-time.
- **Order Information Capture:** Our connector lets you track the activities of customers through order and product details, such as the amount of the items purchased, billing and shipping address, order status, etc.
- **Unknown Lead Mapping:** The connector enables you to associate an unknown lead's tracking history with known customer data to get a view of the customer's journey with the help of Marketo's Munchkin Cookie.
- **Cart Abandonment:** For the customers that did not complete the order, the connector helps you track the information so as to set up nurture emails to send offers for conversion.
- **Historical Data Push:** You also have the option to push the old customer data along with their orders in Marketo that may be lying in your Magento store before installing the connector.
- **Automated Email Nurturing:** Send automated & highly targeted emails to existing customers letting them know about your product offerings and marketing newsletters.

Other Marketo Products by Us

- WordPress Marketo Integration Connector
- Drupal Marketo Integration Connector
- AEM Marketo integration Connector
- M-Clean – A Dedupe App for Marketo

- **Forms Prefill and Progressive Profiling:** Use smart Marketo forms to gradually gain lead intelligence and capture more information with every new touchpoint.
- **DDoS Secure:** DDoS attacks on a website won't affect the connector as it comes with configurable prevention.

How It Works

* We also offer customization according to customer requirements for customer data sync, purchase history tracking and more.
